

Air supply

Offering salons the ultimate technology for facial and body treatments, Oxynergy Excellence combines hyperbaric oxygen to treat a number of conditions alongside ultrasonic spatula, supersonic ultrasound, bipolar radio frequency, tripolar radio frequency and cryotherapy. Results include skin rejuvenation and cellulite reduction in one easy-to-use machine. Tel: 01204 770 985 Oxynergyparis.co.uk

A right old knees up

Promising to transform ageing knees, the VelaShape III Knee Raiser treatment uses a combination of infrared light, bi-polar radio frequency and vacuum to stimulate fibroblast activity and lift sagging skin. RRP £350; Ultra-vela.com

Fruit shoot

DMK's Fibre Blast C uses 20 per cent pure ascorbic acid in liquid form that can be easily absorbed by the skin. Used as a finishing product following a professional treatment, it encourages collagen production, protects the skin and can help calm troubled complexions. 4pk £70 + VAT; Tel: 0844 800 3668

The power of three

New skin rejuvenation device Comcit by Crystal Clear combines three of the latest cell-to-cell technologies in advanced beauty to offer clients a plethora of anti-ageing benefits. With a combination of cryo-oxygen, micro-needling and collagen induction therapy, it promises to offer instantly visible results that will keep clients coming back for more.
